

Kanakku Pulla

Meet Our New Site

Why we built this

It is a portal where shopkeepers can interact with their customers and vice versa.

Our mission is to increase the relationship and trust of the shopkeeper towards his customer.

There is no app which reminds the customer about his debts from local shops.

This web app can fulfill that.

Our solution

The Problem

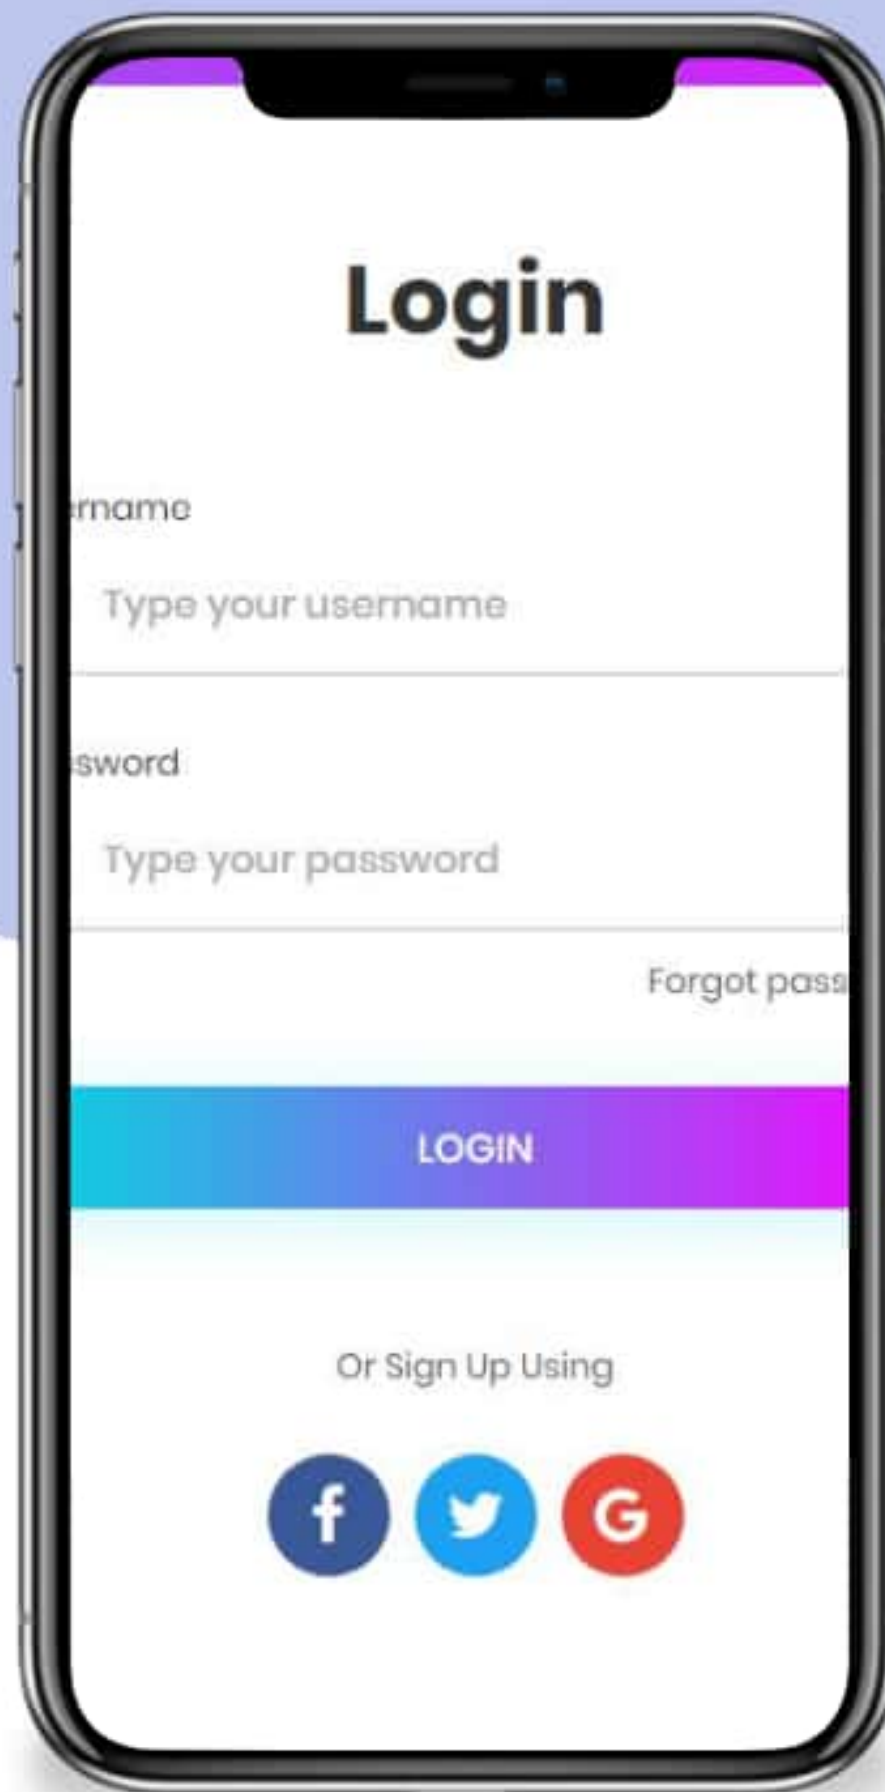

Often Quarrels occur between shopkeeper and customer on the debt, where either person can lie, leading to trust issues.

The Solution

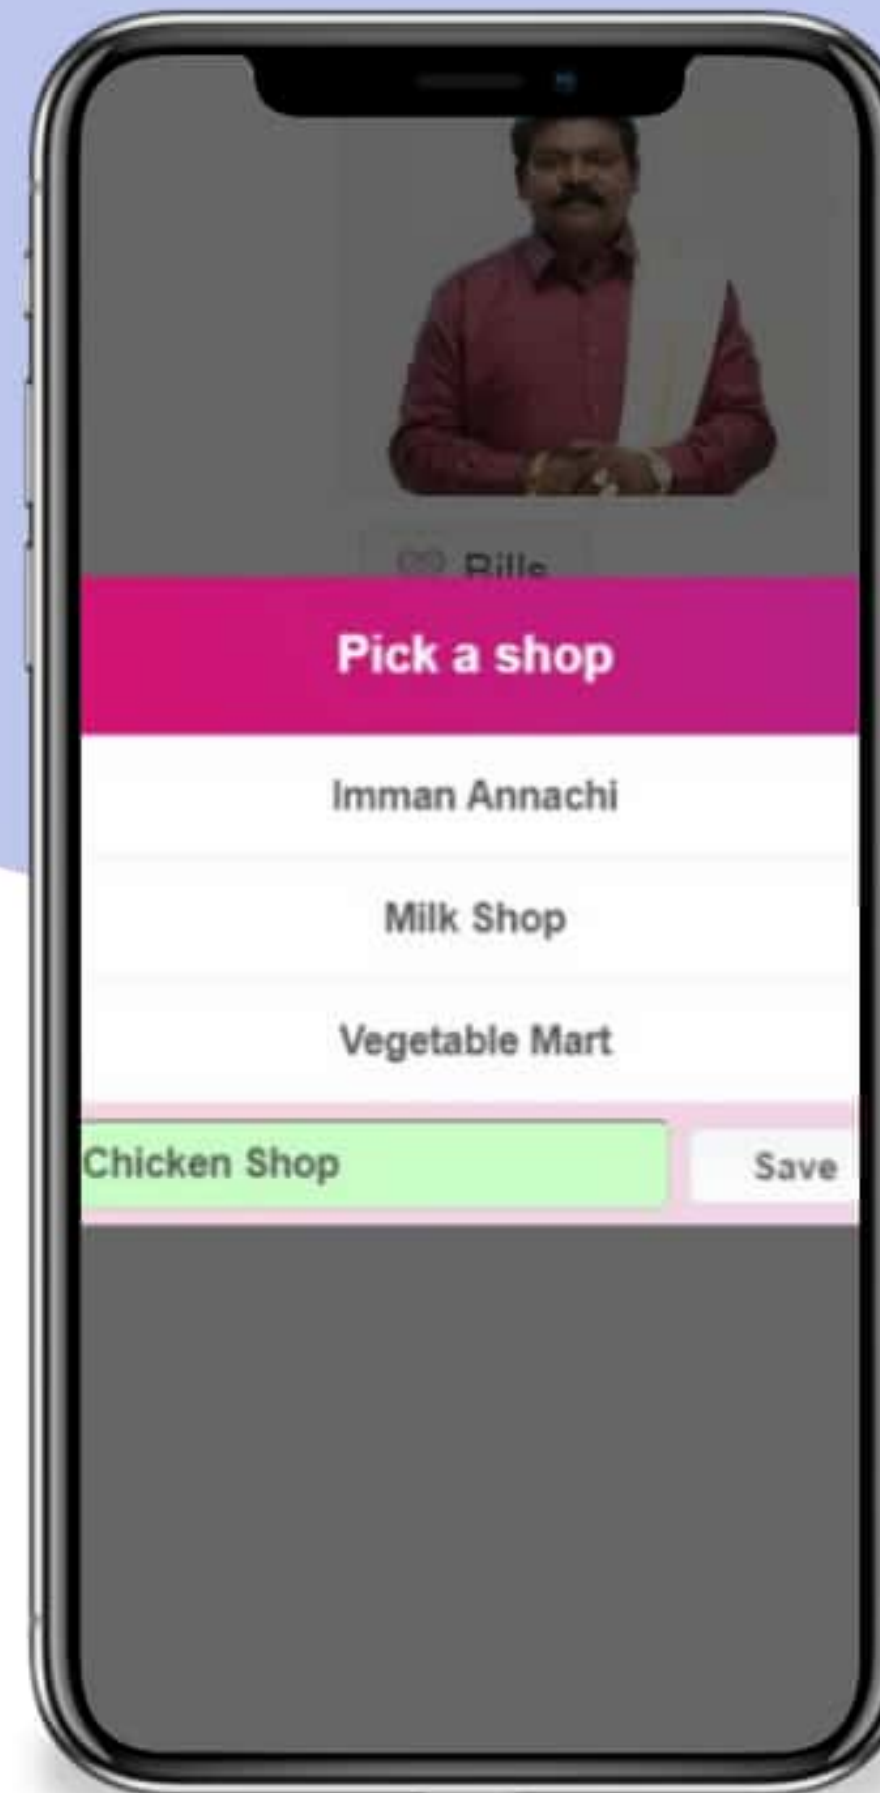

Kanakku Pulla helps you track down the debts of each customer and organizes them. Those payments are reminded to the customers through payment reminders. Also, the customers can chat regarding any stock to the shopkeeper.
